Evaluation of the E-Test and disc diffusion methods for cefepime activity against clinical isolates of <i>Pseudomonas aeruginosa</i>	الدوز روستائی	۱
Study of antimicrobial susceptibility pattern and determination of MIC among clinical isolates of imipenem resistant <i>Acinetobacter</i> from Tehran hospitals	مریم عباسعلی پور بشا	۲
In vitro activity effects of combinations of cephalothin, dicloxacillin, imipenem, vancomycin and amikacin against methicillin-resistant <i>Staphylococcus</i> spp. Strains	محسن خارکوهی	۳
Detection of <i>mecA</i> gene and antibiotic resistance pattern among Methicillin Resistant <i>Staphylococcus aureus</i> M ¹ , isolated from Tehran Hospitals	حمیدرضا فلاحتی	۴
Multidrug-resistance assessment in bacterial samples isolated from tracheal secretions in Imam Reza-ICU ward in patients with nosocomial infections	سجاد زمانلو	۵
Association of antibacterial susceptibility patterns of clinical isolates of <i>Acinetobacter</i> with prevalence of different classes of Integrons	سارا ژاپنی	۶
Study of Multiple Resistances in High Level Vancomycin Resistant Enterococci	سحر نظیری	۷
Typing and molecular analysis of vancomycin resistant enterococci isolated	فاتح رحیمی	۸
Detetion of high-level aminoglycoside-resistant enterococci among clinical isolates	نرگس دادفرما	۹
